

April 15, 2020

This is in consideration to the health and safety of our employees and landowners during the COVID 19 crisis:

Effective immediately we are closing the bathhouse in the RV Park. The RV Park will remain open for camping, but campers will need to use the facilities they have on board. We ask you to please follow the safety guidelines set forth by state and federal governments until this passes.

On April 30th we will readdress the issue and, following the government's new guidelines, possibly reopen the bathhouse on May 1st.

This is something we don't like doing but everybody's health must remain a top priority.

Thank you for your understanding
